Minutes of Meeting

Dated: 15/05/2023

Attendees ASAHI: Sarvesh San

Attendees SATO: Dipak Pathak, Shekhar Sharma San

Motive: AEP&PLC Label Printing & Verification.

Development Points:
1. When part will be print after PLC signal and then user will verify the barcode from HHT application. 2. Until last part will not be verified till then next barcode label will not be print. 3. When user not able to scan the last barcode while verification then HHT/PC module higher/supervisor user will verify the barcode after remark declaration. 4. Recalibration issue or any hurdle while production, As discussed, we will provide the manual push button where user push the button can give the command to the printer using PLC (Manual signal).

Conclusion: We will provide you quotation for the same.
